6.0 Scope of the project

The scope of the project is postgraduate students and supervisors from the local universities. The project aims to have a website that acts as a unified platform for postgraduate studies supervision. Below are the features of the project:

1. Filters: Students are able to filter through the list of supervisors according to the expertise, field of study and affiliations.
2. Contact: Through the platform students will be able to approach the supervisor, check on their availability and review their past publications.
3. Background check: Supervisor will be able to examine the personal details and backgrounds of their students.
4. Monitor: Supervisor will be able to monitor and comment on the progress of their student, especially regarding thesis writing and submission.
5. Timetable: Students will be able to schedule an appointment with their supervisor through the built-in applications.
6. Deadline: Students will be informed of their deadline through the built-in calendar.
7. Guideline: The guideline will be included to help the postgraduate students to be accepted by the supervisor.
8. Suitable workload: Supervisor will be able to determine their own workload by setting a limit for the number of postgraduate students under their supervision.

The project still comes with its own limitations. Integration with third-party platforms is still required for communication and background check purposes as the platform will not include a built-in messaging platform. The platform will also be available for local institutions only and will not include international universities.
